

MODEL 660 HINGED STEEL BELT CONVEYOR

Large scrap handling systems dictate using a rugged steel belt. Consider the Model 660, 6" pitch Hinged Steel Belt Conveyor. By using the unique Titan 6" pitch belting, The Model 660 will satisfy most heavy-duty scrap handling requirements. Our uniquely designed siding reduces the gap between siding and apron (eliminating carryover) and yet the rugged (1/4" thick) design compensates for most severe applications. Combine the unique siding with a standard 1/4" thick apron, 3" diameter, bushed, single flanged roller, double outside sidebars and a 3/4" thru axle and you have a conveyor that will withstand years of heavy industrial use. Four different configurations are available with standard curves of 30°, 45°, and 60° available.

MODEL 660 SPECIFICATIONS

DRIVE:.....	3/4 H.P. 230/460/3/60
SPEED:	30 F.P.M.
FRAME:.....	Formed 7 Gauge
SPROCKETS:	6 Tooth, 12" P.D.
BEARINGS:.....	Grease Sealed
SUPPORTS:.....	Structural Channel
PAINT:.....	One Coat Industrial Enamel
