Custom Conveyor Systems

Since 1981, Titan sales & engineering has been working with industry to solve manufacturing, assembly, packaging and material handling problems. Our custom designed systems have helped our customers get lean, cut time and get products to customers in a more efficient manner.

We have experience and expertise in all of the most challenging applications and industries. At Titan, we welcome the questions "Do you think you could build a conveyor system like this?"

Call Titan at 800-558-3616 to talk to our representatives to help solve your material handling problem.

Typical Applications

Over the past two decades, we've engineered and built conveyor systems for such applications as:

- Moving golf balls from a six-lane-wide conveyor belt to packaging machinery
- Seat, tire and wheel handling for automotive assembly lines
- Food handling of candy, mints, jelly beans, chocolate and lettuce
- Handling of 2,000 degree red-hot forgings and 600 degree parts from casting operations
- Handling such materials as gunpowder, wastewater sludge and foundry sand
- Packaging conveyors to handle totes in warehouse and distribution systems
- Recycling systems for municipal and private recycling operations
- Robotic parts delivery system for defense contractor
- Assembly line conveyor system for furnace & air conditioner manufacturer

Titan Industries has a fully staffed in-house conveyor engineering and manufacturing operation.

We are willing to customize our standard conveyors and design custom solutions to meet our customers requirements with innovative ideas, but we continually strive to “keep it simple” and keep up a dialogue with our customers.

So that our customers can visualize what they are getting and check dimensions for critical clearances, we generate approval drawings for their scrutiny and review. After approval, we manage and track each job using the newest software capabilities. Then we deliver, on time and on budget.

- Large Scale Bulk Processing
- Warehouse Cased Product
- Waste Paper Processing
- Robotics Industry
- Small Scrap Metal
- Large Scrap Metal
- Package Goods
- Heavy Industry
- Bulk Material
- Pallet and Drum
- Customized Process Conveying
- Tire & Wheel Systems
- Appliance Assembly Lines
