## MODEL MDR MOTOR DRIVEN ROLLER CONVEYOR POLY V-BELT

Titan Conveyors™ introduces the Motorized Driven Roller Conveyor, a modular conveyor system utilizing a 24 volt DC motorized drive within a roller. Adjacent rollers are slave-driven from it using chains, Poly V-belts, or Urethane O-belts. Loads up to 3900# can be moved with these clean and efficient motorized roller systems.

Among many advantages of the Motorized Driven Roller Conveyor are:

- · Maintenance free
- Lower operating cost
- Plug & play controls
- · Lower power consumption
- Reversible
- No awkward motor & gearbox
- Quieter
- · Dynamic braking
- · Low profile pop-up transfer
- · 24v Safety
- Variable speed

Motorized driven roller conveyors are perfect for large zone controlled systems in assembly lines or unit handling of pallets and cases.
